

Injury Management

Efficient documentation and resolution for work-related injuries

Employer's First Report of Injury (EFR) allows administrators, supervisors, and department representatives to efficiently submit, monitor and resolve the initial causes and resulting disability periods from work injuries.

Employee:

- Submits injury claim
- Submission generates email notification to Supervisor and Administrator

Supervisor:

- Acknowledges injury claims
- Performs employer investigation
- Tracks and verifies corrective actions

Administrators:

- Reviews and processes electronic claim submission to third party claims management system
- Shares and tracks work status with department representative
